Part A: Explanatory Notes Pursuant to Malaysian Financial Reporting Standard 134 (“MFRS 134”) Interim Financial Reporting

A1. Basis of Preparation

The unaudited condensed interim financial statements for the Group and the Bank have been prepared under the historical cost convention except for the following assets and liabilities that are stated at fair values: financial assets at fair value through other comprehensive income, financial assets and liabilities at fair value through profit or loss, derivative financial instruments and investment properties.

The unaudited condensed interim financial statements have been prepared in accordance with the requirements of Chapter 9, part K of the Listing Requirements of Bursa Malaysia Securities Berhad, MFRS 134 *Interim Financial Reporting* and IAS 34 *Interim Financial Reporting*.

The unaudited condensed interim financial statements do not include all the information and disclosures required in the audited annual financial statements, and should be read in conjunction with the audited annual financial statements for the financial year ended 31 December 2025. These explanatory notes attached to the audited condensed interim financial statements provide an explanation of events and transactions that are significant to an understanding of the changes in the financial position and performance of the Group and of the Bank since the financial year ended 31 December 2025.

The unaudited condensed interim financial statements of the Group include Islamic banking and insurance business. Islamic banking refers generally to the acceptance of deposits, granting of financing and dealing in Islamic securities under the Shariah principles. Insurance business refers to the underwriting of general and life insurance business, the management of general and family takaful business and investment-linked business.

The material accounting policies and methods of computation applied by the Group and the Bank are consistent with those adopted in the most recent audited annual financial statements for the financial year ended 31 December 2025 except for adoption of the following amendments to MFRS Accounting Standards, which is effective for annual periods beginning on or after 1 January 2026:

- Amendments to MFRS 9 *Financial Instruments* and MFRS 7 *Financial Instruments: Disclosures* – *Classification and Measurement of Financial Instruments*
- Amendments to MFRS 9 *Financial Instruments* and MFRS 7 *Financial Instruments: Disclosures* – *Contracts Referencing Nature-dependent Electricity*

The adoption of the above amendments to MFRS does not have any significant financial impact to the Group's and the Bank's financial statements as disclosed below:

Amendments to MFRS 9 *Financial Instruments* and MFRS 7 *Financial Instruments: Disclosures* – *Classification and Measurement of Financial Instruments*

The amendments clarify the following:

- A financial liability is derecognised on the settlement date, i.e., when the related obligation is discharged, cancelled, expired or the liability otherwise qualifies for derecognition. It also introduces an accounting policy choice to derecognise financial liabilities that are settled through an electronic payment system (“EPS”) before settlement date if certain conditions are met;
- Assessment of the contractual cash flow characteristics of financial assets that include Environmental, Social, and Governance (“ESG”)-linked features and other similar contingent features; and
- The treatment of non-recourse assets and contractually linked instruments (“CLI”).

A1. Basis of Preparation (cont'd.)

Amendments to MFRS 9 *Financial Instruments* and MFRS 7 *Financial Instruments: Disclosures – Classification and Measurement of Financial Instruments* (cont'd.)

The amendments require additional disclosures in MFRS 7 for financial assets and liabilities with contractual terms that reference a contingent event (including those that are ESG-linked), and equity instruments classified at Fair Value through Other Comprehensive Income ("FVOCI").

The new requirements can be applied retrospectively with an adjustment to opening retained earnings. Prior periods are not required to be restated and can only be restated without using hindsight. An entity is required to disclose information about financial assets that change their measurement category due to the amendments.

The amendments do not have a significant impact on the preparation of the Group's and the Bank's financial statements.

Amendments to MFRS 9 *Financial Instruments* and MFRS 7 *Financial Instruments: Disclosures – Contracts Referencing Nature-dependent Electricity*

The amendments clarify the following:

- For the nature-dependent electricity contracts, like power purchase agreements ("PPAs") that meet own-use exemptions, an entity is allowed to exclude such contracts from the scope of financial instruments accounting under MFRS 9. Instead, the PPAs will be treated as non-financial contracts as part of normal operating expenses. Own-use exemptions are applied if the electricity is purchased with the intention of being used for the entity's own operational needs, rather than reselling it or using it as a trading asset. The entity needs to expect that the quantity of electricity it agrees to purchase will align with its expected consumption needs and must actually use the electricity it buys; and
- On the other hand, for the PPAs that do not meet the own-use exemption, such contracts are recognised as derivatives and valued at fair value through profit or loss ("FVTPL"). Applying hedge accounting can help entities reduce profit or loss volatility by aligning the accounting treatment with how these PPAs hedge the price fluctuations of future electricity purchases or sales.

Under the amendments, an entity may apply the own-use exemption to certain PPAs, meaning these contracts would not be recognised on its statement of financial position. In this scenario, the entity is required to provide additional disclosures on:

- Contractual features that subject the entity to fluctuations in electricity volume and the risk of receiving surplus supply;
- Projected future cash flows from unrecognized contractual obligations to purchase electricity within the relevant time periods;
- Qualitative information on how the entity evaluates if a contract could turn onerous; and
- Both qualitative and quantitative details regarding the costs and proceeds related to the purchase and sale of electricity, derived from the information used in the 'net-purchaser' evaluation.

The amendments do not have a significant impact on the preparation of the Group's and the Bank's financial statements.

A2. Accounting Policies

The audited annual financial statements of the Group and of the Bank for the financial year ended 31 December 2025 were prepared in accordance with MFRS Accounting Standards and IFRS Accounting Standards and the requirements of the Companies Act 2016 in Malaysia. The material accounting policies adopted in preparing these unaudited condensed interim financial statements are consistent with those of the audited annual financial statements for the financial year ended 31 December 2025 except for the adoption of the amendments to MFRS Accounting Standards which is effective for annual periods beginning on or after 1 January 2026 as disclosed in Note A1.

A3. Significant Accounting Estimates and Judgements

The preparation of unaudited condensed interim financial statements requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of income, expenses, assets, liabilities, the accompanying disclosures and the disclosure of contingent liabilities. Although these estimates and judgements are based on management's best knowledge of current events and actions, actual results may differ.

In preparing these unaudited condensed interim financial statements, the significant judgements made by management in applying the Group's and the Bank's accounting policies and the key sources of estimation uncertainty were the same as those that applied to the audited annual financial statements for the financial year ended 31 December 2025.

A4. Auditors' Report on Preceding Audited Annual Financial Statements

The auditors' report on the audited annual financial statements for the financial year ended 31 December 2025 was not qualified.

A5. Seasonal or Cyclical Factors

The operations of the Group and of the Bank were not materially affected by any seasonal or cyclical factors during the financial half year ended 30 June 2026.

A6. Unusual Items Due to Their Nature, Size or Incidence

During the financial half year ended 30 June 2026, save as disclosed in Note A8 below, there were no unusual items affecting the assets, liabilities, equity, net income or cash flows of the Group and of the Bank.

A7. Changes in Estimates

There were no material changes in estimates during the financial half year ended 30 June 2026.

^ Included in the Bank's loans/financing to financial institutions is financing granted to Maybank Islamic Berhad ("MIB"), a subsidiary of the Bank under the Restricted Profit-Sharing Investment Account ("RPSIA") amounting to RM43,057.3 million net of expected credit losses (31 December 2025: RM48,341.8 million). The RPSIA is a contract based on the Mudharabah principle between two parties to finance a financing where the Bank acts as the investor who solely provides capital to MIB whereas the business venture is managed solely by MIB as an entrepreneur. The profit of the business venture is shared between both parties based on pre-agreed ratios. Losses, if any, are borne by the Bank. Meanwhile, the term funding related to amounts received by the Bank under a government financing scheme introduced as part of the Government's support measures in response to the COVID-19 pandemic. The funding was provided for the purpose of financing eligible SMEs at concessionary rates and supporting COVID-19-related relief measures. The facility had a six-year maturity and was fully repaid upon maturity in June 2026 (31 December 2025: RM1,099.7 million).

* The credit equivalent amount and the risk-weighted amount are derived from using the credit conversion factors and risk-weights respectively as specified by Bank Negara Malaysia for regulatory capital adequacy purposes.

(i) The Group's and the Bank's derivative financial instruments are subject to market, credit and liquidity risks, as follows:

Market Risk

Market risk on derivatives is the potential loss to the value of these contracts due to changes in price of the underlying items such as equities, interest rates, foreign exchange rates, credit spreads, commodities or other indices. The notional or contractual amounts provide only the volume of transactions outstanding at the reporting date and do not represent the amount at risk. Exposure to market risk may be reduced through offsetting items from on and off-balance sheet positions.

Credit Risk

Credit risk arises from the possibility that a counterparty may be unable to meet the terms of a contract in which the Bank and certain subsidiaries have a gain position. As at 30 June 2026, the amount of credit risk in the Group, measured in terms of the cost to replace the profitable contracts, was RM21,033.0 million (31 December 2025: RM17,640.2 million). This amount will increase or decrease over the life of the contracts, mainly as a function of maturity dates and market rates or prices.

Liquidity Risk

Liquidity risk on derivatives is the risk that the derivative position cannot be closed out promptly. Exposure to liquidity risk is reduced through contracting derivatives where the underlying items are widely traded.

A34. Commitments and Contingencies (cont'd.)

- (ii) There have been no changes since the end of the previous financial year in respect of the following:
- (a) The types of derivative financial contracts entered into and the rationale for entering into such contracts, as well as the expected benefits accruing from these contracts;
 - (b) The risk management policies in place for mitigating and controlling the risks associated with these derivative financial contracts; and
 - (c) The related accounting policies.

A35. Capital Adequacy

(a) Capital Adequacy Framework

- (i) Bank Negara Malaysia ("BNM") had on 14 June 2024 issued the updated Capital Adequacy Framework (Capital Components) and Capital Adequacy Framework for Islamic Banks (Capital Components) on the computation of capital and capital adequacy ratios for Conventional banks and Islamic banks respectively. All financial institutions shall hold and maintain at all times, the following minimum capital adequacy ratios:

Common Equity Tier 1 (CET1) Capital Ratio	Tier 1 Capital Ratio	Total Capital Ratio
4.5%*	6.0%	8.0%

* In addition, BNM had introduced Capital Conservation Buffer of 2.5% of total risk-weighted assets ("RWA") as well as Countercyclical Capital Buffer ranging between 0% - 2.5% of total RWA.

- (ii) Total RWA is calculated as the sum of credit RWA, market RWA, operational RWA and large exposure risk requirements as determined in accordance with the Capital Adequacy Framework (Basel II - Risk-Weighted Assets) and Capital Adequacy Framework for Islamic Banks (Risk-Weighted Assets) both issued by BNM on 18 December 2023 for Conventional banks and Islamic banks respectively.

Any exposures which are deducted in the calculation of CET1 Capital, Tier 1 Capital and Total Capital are not subjected to any further capital charges in the computation of RWA.

(b) Compliance and application of capital adequacy ratios

The capital adequacy ratios of the Group and of the Bank are computed in accordance with BNM's Capital Adequacy Framework (Capital Components) issued on 14 June 2024 and Capital Adequacy Framework (Basel II - Risk-Weighted Assets) issued on 18 December 2023. For Operational Risk, this refers to BNM's Capital Adequacy Framework (Operational Risk) issued on 15 December 2023. The total RWA are computed based on the following approaches:

- (A) Credit risk under Internal Ratings-Based Approach and Standardised Approach;
- (B) Market risk under Standardised Approach;
- (C) Operational risk under Standardised Approach; and
- (D) Large exposure risk requirements.

A35. Capital Adequacy (cont'd.)

(b) Compliance and application of capital adequacy ratios (cont'd.)

On an entity level basis, the computation of capital adequacy ratios of the subsidiaries of the Group are as follows:

- (i) For Maybank Islamic Berhad, the computation of capital adequacy ratios are based on BNM's Capital Adequacy Framework for Islamic Banks (Capital Components) issued on 14 June 2024 and Capital Adequacy Framework for Islamic Banks (Risk-Weighted Assets) issued on 18 December 2023. For Operational Risk, this refers to BNM's Capital Adequacy Framework (Operational Risk) issued on 15 December 2023. The total RWA are computed based on the following approaches:

- (A) Credit risk under Internal Ratings-Based Approach and Standardised Approach;
- (B) Market risk under Standardised Approach;
- (C) Operational risk under Standardised Approach; and
- (D) Large exposure risk requirements.

The minimum regulatory capital adequacy requirements for CET1, Tier 1 and Total Capital are 4.5%, 6.0% and 8.0% of total RWA for the financial year ending 31 December 2026 (2025: 4.5%, 6.0% and 8.0% of total RWA).

- (ii) For Maybank Investment Bank Berhad, the computation of capital adequacy ratios are based on BNM's Capital Adequacy Framework (Capital Components) issued on 14 June 2024 and Capital Adequacy Framework (Basel II Risk-Weighted Assets) issued on 18 December 2023. For Operational Risk, this refers to BNM's Capital Adequacy Framework (Operational Risk) issued on 15 December 2023. The total RWA are computed based on the following approaches:

- (A) Credit risk under Standardised Approach;
- (B) Market risk under Standardised Approach;
- (C) Operational risk under Standardised Approach; and
- (D) Large exposure risk requirements.

The minimum regulatory capital adequacy requirements for CET1, Tier 1 and Total Capital are 4.5%, 6.0% and 8.0% of total RWA for the financial year ending 31 December 2026 (2025: 4.5%, 6.0% and 8.0% of total RWA).

- (iii) For PT Bank Maybank Indonesia Tbk, the computation of capital adequacy ratios are in accordance with local requirements, which is based on the Basel II capital accord. The total RWA are computed based on the following approaches:

- (A) Credit risk under Standardised Approach;
- (B) Market risk under Standardised Approach; and
- (C) Operational risk under Basic Indicator Approach.

The minimum regulatory capital adequacy requirement for PT Bank Maybank Indonesia Tbk for the financial year ending 31 December 2026 is 9.0% up to less than 10.0% (2025: 9.0% up to less than 10.0%) of total RWA.

A35. Capital Adequacy (cont'd.)

(b) Compliance and application of capital adequacy ratios (cont'd.)

(iv) For Maybank Singapore Limited, the computation of capital adequacy ratios are based on MAS Notice 637 dated 20 September 2023 (last revised on 9 October 2025) issued by the Monetary Authority of Singapore ("MAS"). The total RWA are computed based on the following approaches:

- (A) Credit risk under Internal Ratings-Based Approach and Standardised Approach;
- (B) Market risk under Simplified Standardised Approach;
- (C) Operational risk under Standardised Approach; and
- (D) Output Floor calculation using Standardised Approach under MAS Notice 637.

The minimum regulatory capital adequacy requirements for CET1, Tier 1 and Total Capital are 6.5%, 8.0% and 10.0% of total RWA for the financial year ending 31 December 2026 (2025: 6.5%, 8.0% and 10.0% of total RWA).

(c) The capital adequacy ratios of the Group and of the Bank

With effect from 30 June 2013, the amount of declared dividend to be deducted in the calculation of CET1 Capital under a DRP shall be determined in accordance with BNM's Implementation Guidance on Capital Adequacy Framework (Capital Components) ("Implementation Guidance") issued on 8 May 2013 (last updated on 9 December 2020). Under the said Implementation Guidance, where a portion of the dividend may be reinvested under a DRP (the electable portion), the amount of declared dividend to be deducted in the calculation of CET1 Capital may be reduced as follows:

- (i) where an irrevocable written undertaking from shareholder has been obtained to reinvest the electable portion of the dividend; or
- (ii) where there is no irrevocable written undertaking provided, the average of the preceding 3-year take-up rates subject to the amount being not more than 50% of the total electable portion of the dividend.

In arriving the capital adequacy ratios for the financial half year ended 30 June 2026, the proposed single-tier first interim dividend has not been deducted from the calculation of CET1 Capital.

Based on the above, the capital adequacy ratios of the Group and of the Bank are as follows:

	Group		Bank	
	30 June 2026	31 December 2025	30 June 2026	31 December 2025
Before deducting electable portion				
CET1 Capital Ratio	15.657%	16.041%	15.686%	15.558%

A36. Derivative Financial Instruments

The following tables summarise the contractual or underlying principal amounts of trading derivatives and financial instruments held for hedging purposes. The principal or contractual amounts of these instruments reflect the volume of transactions outstanding at the reporting date, and do not represent amounts at risk.

Derivative financial instruments are revalued on a gross position basis and the unrealised gains or losses are reflected in "Derivative Financial Instruments" Assets and Liabilities respectively.

A37. Fair Value Measurements of Financial Instruments

Valuation principles

For disclosure purposes, the level in the hierarchy within which the instruments are classified in its entirety is based on the lowest level input that is significant to the position's fair value measurements:

(a) Level 1: Quoted prices (unadjusted) in active markets for identical assets and liabilities

Refers to financial instruments which are regarded as quoted in an active market if quoted prices are readily and regularly available from an exchange, and those prices which represent actual and regularly occurring market transactions in an arm's length basis. Such financial instruments include actively traded government securities, listed derivatives and cash products traded on exchange.

(b) Level 2: Valuation techniques for which all significant inputs are, or are based on, observable market data

Refers to inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. prices) or indirectly (i.e. derived from prices). Examples of Level 2 financial instruments include over-the-counter ("OTC") derivatives, corporate and other government bonds, illiquid equities and consumer loans and financing with homogeneous or similar features in the market.

(c) Level 3: Valuation techniques for which significant inputs are not based on observable market data

Refers to instruments where fair value is measured using significant unobservable inputs. The valuation techniques used are consistent with Level 2 but incorporates the Group's and the Bank's own assumptions and data. Examples of Level 3 instruments include corporate bonds in illiquid markets, private equity investments and loans and financing priced primarily based on internal credit assessment.

The classification in the fair value hierarchy of the Group's and the Bank's non-financial and financial assets and financial liabilities measured at fair value as at 30 June 2026 and 31 December 2025 is summarised in the table:

A37. Fair Value Measurements of Financial Instruments (cont'd.)

Valuation techniques

The valuation techniques used for the financial and non-financial assets and financial liabilities that are not determined by reference to quoted prices (Level 1) are described below:

Derivatives

The fair values of the Group's and the Bank's derivative instruments are derived using discounted cash flows analysis, option pricing and benchmarking models.

Financial assets designated upon initial recognition at fair value through profit or loss, financial investments at fair value through profit or loss and financial investments at fair value through other comprehensive income

The fair values of these financial assets/financial investments are determined by reference to prices quoted by independent data providers and independent brokers. Fair values for unquoted equity securities held for socio economic reasons (classified as Level 3) are determined based on the net tangible assets of the companies.

Loans, advances and financing at fair value through profit or loss and at fair value through other comprehensive income

The fair values are estimated based on expected future cash flows of contractual instalment payments, discounted at applicable and prevailing rates at reporting date offered for similar facilities to new borrowers with similar credit profiles.

Financial liabilities at fair value through profit or loss

The fair values of financial liabilities designated at fair value through profit or loss are derived using discounted cash flows.

B1. Performance Review

(i) Current Period-to-Date vs Previous Corresponding Period-to-Date

The Group posted profit after tax and zakat attributable to equity holders of RM5,171.0 million for the six-month financial period ended 30 June 2026, a decrease of RM45.9 million or 0.9% as compared to the previous corresponding six-month financial period ended 30 June 2025.

The Group's net interest income and Islamic Banking income for the six-month financial period ended 30 June 2026 increased by RM172.6 million or 1.6% to RM10,842.2 million as compared to the previous corresponding six-month financial period ended 30 June 2025.

The Group's insurance/takaful service result decreased by RM188.1 million or 21.7% to RM677.9 million for the six-month financial period ended 30 June 2026 as compared to the previous corresponding six-month financial period ended 30 June 2025.

Other operating income of the Group for the six-month financial period ended 30 June 2026 was RM4,041.4 million, a decrease of RM737.4 million or 15.4% from RM4,778.8 million in the previous corresponding six-month financial period ended 30 June 2025. The decrease was mainly due to higher unrealised mark-to-market loss on revaluation of financial investments at FVTPL of RM1,797.7 million, lower gain on foreign exchange of RM1,218.0 million, lower gain on disposal of financial investments at FVOCI of RM413.7 million, unrealised mark-to-market loss on revaluation of financial assets designated upon initial recognition at FVTPL of RM167.2 million for the six-month financial period ended 30 June 2026 as compared to unrealised gain of RM231.2 million in the previous corresponding six-month financial period ended 30 June 2025, and unrealised mark-to-market loss on revaluation of financial liabilities at FVTPL of RM78.4 million for the six-month financial period ended 30 June 2026 as compared to unrealised gain of RM298.2 million in the previous corresponding six-month financial period ended 30 June 2025. The decreases were, however, moderated by unrealised mark-to-market gain on revaluation of derivatives of RM2,129.7 million as compared to unrealised loss of RM505.4 million in the previous corresponding six-month financial period ended 30 June 2025, and higher gain on disposal of financial assets at FVTPL of RM793.7 million.

The Group's overhead expenses for the six-month financial period ended 30 June 2026 recorded a decrease of RM293.3 million or 3.9% to RM7,234.7 million as compared to the previous corresponding six-month financial period ended 30 June 2025. The decrease in overhead expenses was mainly due to lower personnel expenses of RM292.9 million, lower administration and general expenses of RM91.6 million, and lower marketing expenses of RM66.0 million. The decreases were, however, moderated by higher establishment costs of RM157.3 million.

The Group's net allowances for impairment losses on loans, advances, financing and other debts improved by RM9.4 million or 1.2% to RM798.2 million as compared to the previous corresponding six-month financial period ended 30 June 2025.

The Group recorded net writeback for impairment losses on financial investments of RM338.1 million for the six-month financial period ended 30 June 2026 as compared to net allowances of RM65.2 million in the previous corresponding six-month financial period ended 30 June 2025.

B3. Prospects

Global GDP growth is expected to moderate to 3.1% in 2026 (2025: 3.4%), reflecting slower growth in China in 2026 of 4.7% (2025: 5.0%) and continued relative underperformance in other major economies, such as the Eurozone and Japan. ASEAN-6 GDP growth is expected to remain resilient at 5.0% in 2026 (2025: 5.0%), supported by mitigating measures implemented by ASEAN governments to strengthen domestic demand and contain costs, alongside the ongoing AI-driven technology upcycle and continued geostrategic trade diversion and investment relocation trends.

Against this backdrop, Malaysia's economic outlook remains constructive, with full-year 2026 GDP growth projected at 5.3% (2025: 5.2%). The economy is expected to benefit from technology and trade tailwinds, supported by the AI-driven global technology cycle. It is also expected to be supported by favourable terms of trade, driven by stronger energy exports amid higher commodity prices following developments in the Middle East. Bank Negara Malaysia is expected to maintain the OPR at 2.75% for the remainder of the year, while inflation is projected to remain moderate at 2.0% (2025: 1.4%).

Singapore's GDP growth is expected to strengthen to 5.2% (2025: 5.0%), supported by AI-driven activity, construction demand and low interest rates, which should help cushion the impact of the Middle East conflict. The 3-month Singapore Overnight Rate Average (SORA) is expected to rise to 1.20% by end-2026, driven by strong loan demand and a modest increase in loan-to-deposit ratio (LDR) amid safe-haven inflows. Inflation is projected to increase to 1.7% (2025: 0.9%).

Indonesia's GDP growth has been revised upward to 5.3% in 2026 (2025: 5.1%). Growth will be supported by a pickup in government social spending and sustained investment, including capital expenditure by Danantara, industrialisation, and infrastructure development. Supply disruptions arising from the Middle East conflict may place upward pressure on inflation and weigh on fiscal and current account balances. Nonetheless, the economy is expected to be supported by resilient commodity exports. Bank Indonesia is expected to raise its policy rate by a further 25 basis points to 6.00% by end-2026, while inflation is projected to increase to 3.5% (2025: 1.9%).

Anchored by its ROAR30 strategy, the Group will continue to strengthen its core businesses in its home markets while further integrating its regional footprint to better serve clients across the region.

The Group's growth priorities remain focused on expanding scalable regional businesses across Islamic finance, wealth management, transactions and payments, and corporate and investment banking. At the same time, the Group will continue to strengthen its foundations through investments in technology, data and AI, while enhancing workforce capabilities, productivity and capital efficiency.

The Group's values-based approach remains a key strategic differentiator. Guided by its purpose of Humanising Financial Services, the Group is committed to delivering meaningful outcomes for customers, supporting the real economy, contributing to societal progress and generating sustainable shareholder value.

The Group remains cautiously optimistic and will continue to balance responsible growth with prudent management of asset quality, capital and liquidity. Although the direct impact of the Middle East conflict has moderated, potential spillover effects on commodity prices, inflation and external demand may continue to influence regional operating conditions, and the Group remains vigilant to evolving global developments.
